To download **A treatise on the Richards steam-engine indicator with directions for its use** PDF, make sure you follow the link listed below and save the ebook or gain access to additional information that are relevant to A TREATISE ON THE RICHARDS STEAM-ENGINE INDICATOR WITH DIRECTIONS FOR ITS USE ebook.

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 28 pages. Dimensions: 9.7in. x 7.4in. x 0.1in.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1883 Excerpt: . . . This line, when it exists, is formed by the closing of the exhaust port at some point before the termination of the stroke, when the advancing piston compresses the confined steam to a density proportioned to the decrease of volume. This is illustrated in various degrees in several of the diagrams here shown. This action occasions a loss of power, but not much waste of stream, because the confined steam reacts on the return stroke with a force equal to that expended to compress it. It is useful on engines running at high velocities, by taking up gradually all looseness of the joints, and preventing the entire force of the steam from striking suddenly on the piston. Indeed, so important is the compression in preventing shocks on the centres in engines of this class, that probably locomotives could not be safely run without it. At the same time, the nature of the valve and gear employed on this class of engines is such, that when cutting off very early the compression becomes excessive, involving an increase in the counter-pressure as the piston approaches the centre, which is quite unnecessary for any useful purpose, as is illustrated especially in diagram No. 4. At any ordinary number of revolutions per minute made by stationary or marine engines, the compression is not required, but in a moderate degree is never, perhaps, objections! round it so we may compare the one with the other. t We do not think our...
