The theory and practice of modern framed structures, designed for the use of schools and for engineers in professional practice Volume 3

By John Butler Johnson

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 136 pages. Dimensions: 9.7in. x 7.4in. x 0.3in.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1916 Excerpt: . . . of bearing of the chords are nearly opposite each other, so that the resulting pin moment is still mainly dependent upon the difference in chord stress, or maximum diagonal stress, as in the other case. (See Chapter VIII for examples of pin calculation.) The maximum bending moment being known, the pin diameter is determined from the usual formula for fibre stress in beams, Mc1. In this case c--radius of pin r, and I ir r4-Expressing the result in terms of the diameter D we have 10. 2 MD and D V 10. 2 Ml 2. 17V AT. Tables of resisting moments for various unit stresses and pin sizes are given in the handbooks. The allowable bending stress in pins may be taken fairly high, 24, 000 lbs. per sq. in. in the Specifications, Appendix A. This is for the reason that the assumption of concentrated...
